RE: Medication Shortage Notification

The LGH Pharmacy has notified us that there are (2) current potential shortages on the horizon for the following medications: **Epinephrine 1:10,000 abbojects & Sodium Bicarbonate abbojects.**

In order to cure this shortage, providers *may* see the following changes to the BREMS Drug Box:

- Epinephrine 1:10,000 – Move from 8 abbojects to 6
- Sodium Bicarbonate – Move from abbojects to 50ml vials. The concentration will remain the same. There will be a kit provided in the box with a 60ml syringe & needle necessary for administration.

Thank you for your attention to this matter. And as always, feel free to contact us here at the BREMS office with questions anytime. (434) 947-5934

Thank you,

BREMS Staff on behalf of Regional OMD Dr. Marilyn McLeod and OMD Committee Physicians
